About Me _____

I hold a degree in Management Information Systems (MIS), a field that combines business and technology to improve organizational performance through the use of information systems.
I have a strong interest and active involvement in projects related to programming, data analysis, data management, web design, graphic design, and artificial intelligence. I consistently strive to utilize available resources efficiently to fulfill any requirement or objective.

Education _____

Bachelor's Degree in Management Information Systems (MIS)

Jubail University College – Graduated in 2018

Work Experience _____

- Data analyst (2021 – Present)

  Conducting data analysis to extract insights, build interactive dashboards, and support business decision-making. Skilled in cleaning, organizing, and visualizing data using modern tools and techniques to present clear, actionable findings.

- Technical Support (2018 – 2021)

  Providing end-user support including software, technical issues related to the web platforms.

- Motion Graphic Designer (2018 – 2021)

  Created engaging animated content for digital platforms, including promotional videos, explainer animations, and social media visuals. Collaborated with Media Department to transform concepts into dynamic visual stories using industry-standard tools and creative design principles.

Certifications & Courses _____

- Data Analysis – 2021
- Design Thinking – 2025
